

# TTW10

VARIA  
INSTRUMENTS

TURNTABLE WEIGHT FOR 12" AND 7"

The TTW10 is our turntable weight which combines two needful features for every vinyl DJ: A disc stabilizer and an adapter for 7" records. The TTW10 features a smart mechanism: The 7" adapter inside the weight is moveable- as soon as you put the weight on a 7", the adapter will fall down through the big hole of the vinyl. Your record is now centered and stabilized by the TTW10. If you place the kit on a 12" record, the adapter will remain in the rear position and stabilizes your warped records. A sticky rubber mat on the bottom side protects your vinyl and allows you to control the record in a very direct way. The TTW10 comes in a neat printed box with a linen bag to take it out to your gigs.
